

## For someone to become famous he must have...

## √ Unique advantages!

#### TITAN

ELCO TITAN steel tank is internally coated with a new technology "TITAN" enamel coating. This coating is exceptionally durable and offers the appliance up to a 100% longer life expectancy. Moreover it does not have any pores so that it is proof against micro-organisms and bacteria. Also, thanks to the special enamel coating method, the tank is completely protected against corrosion.

#### **STEEL TANK**

#### **POLYURETHANE INSULATION**

Reinforced insulation made of HCFC free polyurethane of 25mm width and 40 kg/m³ density that is applied with a method that ensures precise and complete tank coverage.

**Result:** Saving energy since heat loss is down to a minimum and the water is kept hot for a longer period of time.

#### **THERMO-ELECTRIC SAFETY**

The ELCO TITAN & ELCO DURO GLASS water heaters are equipped with a safety thermostat as well as a special thermo-electric fuse so that the tank is double-protected from overheating.

#### NEW THERMOMETER

#### **DURO GLASS**

The steel tank is subject to a chemical process and in conjunction with the special enamel coating method –with the use of a vacuum procedure- ensures a perfect adhesion. This special porcelain enamel (DURO GLASS), which is the result of years of research and testing by ELCO, is then fired together with the steel at 860°C, thus acquiring a perfect thermo-chemical adhesion.

Result: The tank is absolutely

Result: The tank is absolutel protected against corrosion.

#### **MAGNESIUM ANODES**

The double magnesium anodes produced by ELCO for the ELCO TITAN water heater and the large magnesium anode available in the ELCO DURO GLASS water heater models guarantee full protection of the tank against electrolysis.

#### SAFETY VALVE

The special safety valve of the ELCO TITAN and ELCO DURO GLASS water heaters protects the tank from over-pressure.

**EXTERNAL TEMPERATURE CONTROL** 

(ELCO TITAN models)

### **Water heater capacity selection chart**

Mt	州州	Note / North	Mark/Mark	North North
50 L	60 L	80 L	100 L	120 L

CAPACITY

# **▼ELCOTION**Superiority and Evolution!

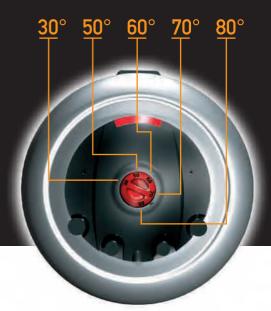

- Tank made of high-spec steel sheet, pressure tested at 16 bar
- Tank internal protection with "TITAN" double enamel coating
- Tank protected by two large magnesium anodes produced by ELCO
- Heating element made of 316L stainless steel with low surface load charge
- Safety thermostat with integrated thermo-electric fuse
- Safety valve with diaphragm and drainage
- External temperature control
- External thermometer (for VERTICAL wall-mounting & HORIZONTAL wall-mounting models)
- Heating element indication lamp
- Large inspection flange for easier cleaning and maintenance of the water heater
- HCFC free, rigid polyurethane foam insulation

Models: VERTICAL wall-mounted, HORIZONTAL wall-mounted &

FLOOR- mounted

Capacities: 10, 20, 50, 60, 80, 100 & 120L & Boilers 60, 80, 100 & 120L

Vertical Super Boilers 80, 100 & 120L

## Save up to 50% energy!

The new ELCO TITAN electric water heater features an external temperature control that enables you to enjoy hot water at the temperature you want... in all 4 seasons! You adjust the desired water temperature according to the season and your needs. As a result you can have energy savings of up to 50%.

control

€60

#### **ANNUAL SAVINGS**

Annual cost without external temperature control €125

## JELCO DURO GLASS ✓ Innovation & Reliability!

- Tank made of high-spec steel sheet, pressure tested at 16 bar
- Tank internal protection with "DURO GLASS" special enamel coating
- Tank protected by a large magnesium anode produced by ELCO
- Heating element made of 316L stainless steel with low surface load charge
- Safety thermostat with integrated thermo-electric fuse
- Safety valve with diaphragm and drainage
- External thermometer (for VERTICAL wall-mounting & **HORIZONTAL** wall-mounting models)
- Heating element indication lamp
- Large inspection flange for easier cleaning and maintenance of the water heater
- HCFC free, rigid polyurethane foam insulation

Models: VERTICAL wall-mounted, HORIZONTAL wall-mounted &

FLOOR- mounted

Capacities: 10, 20, 50, 60, 80, 100 & 120L & Boilers 60, 80, 100 & 120L

#### **BOILERS: The Super Saving Solution!**

The ELCO TITAN BOILERS & ELCO DURO GLASS BOILERS are equipped with a large, steel-tube (G3/4"), spiral-shaped enamel coated heat exchanger that provides optimum performance. When connected to the central-heating system or to the solar collectors, the boiler supplies free hot water all year around. No electricity needed!

New SUPER BOILER models available with double than standard heat exchanging surface, as powerful as an instant water heater!

#### **Total After Sales Service from ELCO**

The ELCO TITAN and ELCO DURO GLASS electric water heaters have been designed to operate with maximum performance for many years. They may never require any SERVICE, but you can be assured that should a problem ever occur, ELCO offers a complete and reliable AFTER SALES SERVICE.

## √ Guaranteed Quality, Safety and Economy!

ELCO, the leading manufacturing industry of electric water heaters in Greece since 1950, was the first that implemented and continues to improve the innovative GLASS enamel coating procedure – manifested by the ELCO DURO GLASS name. With its experience of more than half a century and the know-how to invent and apply innovative technologies, ELCO is proud to introduce the new series of ELCO TITAN and ELCO DURO GLASS electric water heaters.

Designed with the use of Computer Aided Design programs (CAD), ELCO electric water heaters are manufactured on a fully automated production line and undergo quality inspections in consecutive phases of the production process. The high manufacturing quality based on European standards and the conformity to ISO 9001:2000 ensures that your ELCO electric water heater will have great longevity as well as an absolutely safe operation.

Moreover the ELCO TITAN external temperature control enables you to adjust the desired water temperature according to the season and your needs for even better performance and lower energy consumption.

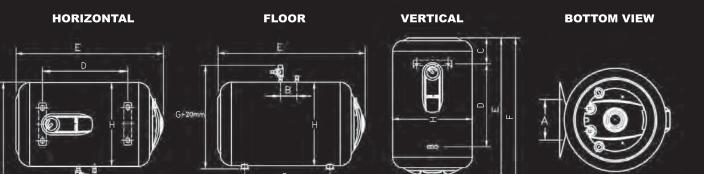

So the ELCO electric water heaters, the top selling water heaters in Greece and with rapidly growing sales in several other markets worldwide, remain the most reliable choice that guarantees the safest and most economical operation so that you can indulge in your everyday activities with peace of mind.
